**WORKSource**

**On-the-job training.  
What's in it for employers?**

On-the-job training is an excellent alternative if you are having a hard time finding qualified job applicants for your business.

WorkSource will partially reimburse you for each participating employee's wages during the training period.

On-the-job training is a training subsidy that offers you a low-cost way to train new employees while also providing knowledge and skills essential to job performance.

Benefits of on-the-job training:

- Get partially reimbursed for wages during the training period.
- Train to specific skills you need.
- Retain skilled workers.

Participation and reimbursement regulations vary based on the particular program. To learn more, contact your local WorkSource center.
